

The ultimate stain remover that actually works on a seriously set in stain! Never buy oxyclean again!

I'm seriously so excited to share with you THE ULTIMATE STAIN REMOVER THAT actually works on a seriously set in stain!

I've tried many famous chemical cleaners products to remove my child's stains, but nothing works as this incredible DIY, it requires only 3 household ingredients.

You will need:

- 1 teaspoon Bleu Dawn Dishwashing liquid.
- 2 tablespoons of baking soda.
- 4 tablespoons of hydrogen peroxide.

This concoction is super easy and fast to make, you need just to mix the 3 ingredients together in a medium bowl, until well combined.

HOW TO USE IT ???

I take a yucky stained shirt, and I poured 1 cup of warm water over stains, then I gently agitated the mixture using a toothbrush over the old stains, I let the mixture sit for one hour, and I washed and ironed as usual.

GIVE IT A TRY, YOU WILL BE SURPRISED BY THE RESULT, Try this spot remover on chocolate stains, blood stains, pen marks, grease stains, AND MUCH MORE!!!
